## Underdeck Rotary Screw Air Compressor

The BOSSAIR PTO design allows you the option to choose any CFM output up to 85 CFM utilizing the BOSSAIR 85 or up to 185 CFM with the BOSSAIR 185. Simply adjusting the engine speed control the compressor will produce the CFM continuously. Once the PTO is engaged, engine torque and horsepower are transmitted to the air compressor via a properly sized tubular drive shaft. The speed control for the compressor modulates according to air demand, which offers fuel savings, as well as, reduces wear and tear on the vehicles engine. When the job is complete, simply disengage the PTO and continue to the next job site.

Because the PTO air compressor components become an integral part of the vehicle and are mounted below the bed, it offers many advantages you cannot get when using conventional air compressors.

- **Frees up the tow hitch.**
- **Takes up no bed space** - BOSSAIR PTO air compressor are mounted under deck.
- **Fewer parts** - Compared to its towable or cross-mount counterparts.
- **Light weight** - Less than 285lbs for the BOSSAIR 85 and 425lbs for the BOSSAIR 185.
- **Only one engine to maintain** - Simplifies preventive maintenance.
- **Cost efficient** - No need for additional licensing fees or insurance.
